

Osman Sabri Ünsal is co-leader of the Architectural Support for Programming Models group at the Barcelona Supercomputing Center (BSC, Spain). He holds BS, MS, and PhD degrees in electrical and computer engineering from Istanbul Technical University (Turkey), Brown University (USA), and University of Massachusetts, Amherst (USA), respectively. His research interests include computer architecture, reliability, and hardware support for programming models/runtimes. In the past he has worked at Intel Microprocessor Technology Labs and BSC-Microsoft Research Center.
